Building Control Solutions

A new name
and a new look
for our Building
Control service

Building Control Solutions

The new name in building control

The building control services of Wokingham, Windsor & Maidenhead and West Berkshire councils have come together to combine our strengths to become Building Control Solutions.

Traditionally the building control function has been delivered by separate local authorities. Our intention is to provide you with one point of contact for the three areas. There will be the same familiar names and faces as before however now we have one website and two local offices for you to contact us.

Our values remain the same as they were before and you will still benefit from our many skills including local knowledge, customer service and a quick response to important aspects such as site visits.

Experienced Surveyors with local knowledge

Our team of pro-active surveyors harbour a wealth of technical and local knowledge to help ensure your project runs smoothly.

Thorough inspections

To ensure an effective transition of work from plan to site we inspect work regularly and when the builder needs us to.

Independent and accountable

We will always be here and answerable for what we do. This provides reassurance that we get it right first time.

Fast access to other organisations

We provide fast access to organisations such as the Fire Authority. We also have access to previous plans, historic documents, maps and energy conservation advice to provide you with a comprehensive service.

Flexible approach

Our friendly inspection service offers a professional and responsive third-party check throughout the construction process so that you receive the best impartial advice.

Free and helpful advice

Helpful advice by professional surveyors before submission to help identify and resolve design issues before they become a problem on site.

Remember – There are never problems, only challenges and we aim to help you meet them
