

# Early Intervention Principles

- Everything we do, we do 'WITH' not 'for' and not 'to'.
- Everything we do promotes better outcomes for children, young people and families.
- We strive for safe and effective practice across the whole system.
- For each one child, we aim to have one assessment, and one plan.
- We provide targeted, focused support to those in greatest need first.
- We support local approaches to service delivery that are appropriate to need and that promote self-reliance and community resilience.
- We have whole system clarity about the inputs, outputs, outcomes and impact of what we do.
- We change the shape and focus of services to achieve these principles.
- Success changes the whole system and requires the whole system to change.
