

Do's

Best practice (Locked doors, number of the properties to display authorised access only)

Don'ts

Store not covered – even a lock would not help. Not big enough to accommodate recycling boxes

Bin store inaccessible due to parked car (just under the sign of No Parking)

Grass verge in front of the bin store (inaccessibility)

Limited storage makes the use of recycling bins inconvenient for recycling and collection by the crew

Purpose built Collection points causes problems once these properties are occupied

Bins left in open attract flytipping

Any door frames and raised kerbs poses Health & Safety risks to the collection crew – dropped kerb should be in place

In order to ensure Health & Safety of residents as well as our crew members bin store should not be shared for any other facility.
